

Young Leaders, Strong City Receives NewSchools Venture Fund Grant

Young Leaders, Strong City (YLSC) is proud to announce its selection as a member of the Racial Equity portfolio at NewSchools Venture Fund, a national nonprofit that provides funding and support to innovators with bold ideas to reimagine learning and advance equity in education.

The investment from NewSchools will help YLSC maintain general operations for the organization. NewSchools made funding decisions through a process that shifts grantmaking power to a diverse council of parents, students, and educators who brought their own experiences, ideas, and concerns to discussions about what solutions are needed at this moment. The funded organizations are taking innovative approaches to disrupt racial inequities and advance the well-being and achievement of students in Black, Latino, and Indigenous communities nationwide.

In addition to funding, YLSC will receive management assistance support from NewSchools and will join a national community of practice focused on advancing racial equity solutions.

We look forward to continuing our work with NewSchools and making a real difference!
